

## LC Gang High-Density Adapter Series

Densest packaging available, with dust protection, in an optical device

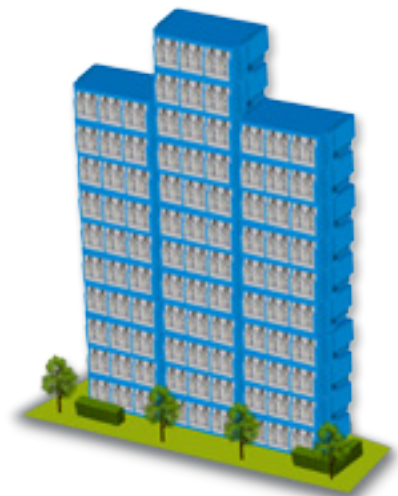

Introducing Sanwa's LC High-Density Multiport Adapter Series; the industry's highest density packaging available.

Sanwa LC High-Density Multiport Adapter Series adapters are currently offered in 6-, 8-, and 12-port versions, with metal-plate, built-in dust protection shutters optionally available. Rattle free mounting into the panel offers additional dependability, and our five color options of blue, beige, green, aqua, and heather violet adds additional uniqueness.

These advanced adapters were designed with no latches on the top or bottom of the body, and allows them to be mounted on top of one another with no wasted space. This unique design delivers optimal space efficiency and makes high-density mounting possible.

- *Insertion loss (typical): 0.2dB or less*
- *UL94-V0 flammability grade*
- *RoHS and REACH compliant*
