

Now in Short Boot style

## LC PM Short Boot Connector Series

Enables alignment of the ferrule to the most performance-optimized position.

Ideal for use with polarization-maintaining fiber cable, Sanwa LC PM Short Boot Connectors offer 360° infinitely variable tuning capabilities, even after assembly. The short boot design means they are the most compact LC PM connectors in the industry.

Easy and simple 360° tuning allows maximum directional alignment. Now offered in a short boot style, these connectors are ideal for even the most limited cabinet space. The pre-assembled connector body means easy assembly and cost-efficient production.

- 360° infinitely variable tuning
- Insertion loss (typical); 0.2dB or lower
- Return loss (typical); PC = 55dB (UPC), 60dB (APC)
- Extension ratio: 25dB or more
- UL94-V0 flammability grade
- RoHS and REACH compliant
- Meets with GR326 CORE TWAL criteria with G657B bend-free cable
- FC, SC and MU PM connectors also available
- UPC and APC available
- 0.9mm, 2.0mm and 3.0mm OD cable types
